

#Jenny

Finally I get this ebook, thanks for all these I can get now!

---

#Rio

Cool! I'am really happy

---

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

---

#Hun Tsu

wtf this great ebook for free?!

---

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

---

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

---

$$0 = -16t^2 + 40t + 1.5$$

**\*\*The height of the ball is 0ft since it's on the ground.**

Since the equation is set equal to 0, we can solve Using the quadratic formula.

where:  $a = -16$   $b = 40$   $c = 1.5$

$$\text{Formula: } x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

$$x = \frac{-40 \pm \sqrt{40^2 - 4(-16)(1.5)}}{2(-16)}$$

$$x = \frac{-40 \pm \sqrt{1696}}{-32}$$

$$x = \frac{-40 + \sqrt{1696}}{-32} \text{ or } x = \frac{-40 - \sqrt{1696}}{-32}$$

$$x = -.037 \qquad x = 2.54$$

**The ball landed on the ground in 2.54 seconds.**
